A Description of the four Quarters of the Year ; and first of Winter.

Sol in Capricorn, Aquarius, Pisces.

According to the custom of Writers in this kind, Winter-quarter is the first quarter, which took beginning the 11 day of December, at which time the Sun enter'd into the first degree of the cold and dry Sign Capricorn, being the most remote from us, in his farthest South Declination, causing the days with us to be shortest, and the nights longest. This quarter continues until the Sun hath slowly passed through Capricorn, Aquarius, and Pisces ; and doth naturally resemble Old Age.

Of the Spring. *Sol in Aries, Taurus, Gemini.*

This quarter doth take beginning the 10 of March, at which time the Sun entreteth into the first minute of Aries, making equal day and night ; and continues whilst the Sun is passing through Aries, Taurus and Gemini. This quarter doth resemble Growing Youth.

Of Summer. *Sol in Cancer, Leo, Virgo.*

The Summer-quarter doth take his beginning when the Sun enters into the first degree of Cancer, which will be this year on the 11 of June ; and continues whilst the Sun passeth through Cancer, Leo, Virgo. Now the days are longest, and the air hottest ; therefore but for necessity, bid Physick adieu.

Of Autumn. *Sol in Libra, Scorpio, Sagitarius.*

Autumn, or Harvest-quarter (commonly called the Fall of the Leaf, of some the latter Spring) begins when the Sun enters into the first degree of Libra, again making the day and night of equal length ; which will be this year the 12 of September, and continues whilst the Sun passeth through Libra, Scorpio, and Sagitarius. This quarter doth fitly resemble Declining Age, and Phlegmatick Complexion.

Perkins. 1687.

Gaul to strow on your Floors, to destroy Moths and Fleas, fence your Copfes, use moderate Dyet, take heed of great thirst, for nothing bringeth the pestilence or pestilent Diseases sooner than extreme thirst, and fervent heats, and cold taken suddenly upon them, take no Physick, bleed not but upon violent occasions.

AUGUST Observations. Follow close your corn Harvest, sow winter herbs in the new of the Moon, gather Garden-seeds, mow Barley and Oats, gather your Summer-fruits, refrain from sleeping in the day time after Meat, avoid riot and excess.

SEPTEMBER Observations. In the beginning of this Moneth and end of the former, gather Hops when they wax brown, the weather bring fair and no dew on the ground, kill Bees, make Verjuice, sow Wheat and Rye, remove and set all slips of Flowers between the two Lady days, put Swine to mast, remove Trees every new Moon from September till February, especially in the new of the Moon, the weather fair and warm, wind South or West, use Physick moderately, forbear Fruits too pleasant or rotten, shun riot and excess of Diet.

OCTOBER Observations. Sow Wheat and Rye, the sooner the better, for fear of rain, set Acons and Nuts, gather winter fruit, the weather dry, in the afternoon, and in the wain of the Moon, cut Rose-trees if you desire to have store of Roses, do this once in two years, refuse not any needful Physick at the hands of the learned, and use all moderate Sports to revive the vital Spirits.

NOVEMBER Observations. Make Malt, kill Hogs, trench Gardens with dung, set Crab-tree-stocks, sow Wheat and Rye in exceeding hot sandy grounds, cut down Timber for Plows, Carts, and other Implements for Husbandry, use wholsom Meat and Drink, with good exercise to preserve health.

DECEMBER Observations. In this and the next moneth cut down Timber, in the last quarter of the Moon uncover the Roots of Fruit-trees: set Beans and Pease, cover all the best Flowers and Herbs from Frosts and Storms with old rotten Horse-dung, look well to your Cattell, water and keep moist your Meadows, let Horses blood, and drink good Wine and Strong Drink, keep thy Body warm clad, thy House warm and dry, cast all care from you, and relieve those that are in want with thy charity: Thus I have ended these Observations which are laid down for thy advantage, make good use of them, and give God the Glory.
